

GHG Inventory Data in FY2025

Company Name	Nomura-Sangyo Co., LTD
Occupation	sheet metal processing
Address	Head office/Fuchu factory 1-13-3 Nishihara-cho Fuchu-city Tokyo Iwate factory 128 Motosugi Maesawa Oshu-city Iwate
Number of employees	82 (Head office 25, Iwate factory 57)

CO2 reduction target is 4.2%/year.

Basic unit is kg-CO2/million yen (kg-CO2/M yen).

Fiscal year is from May to next April.

Base year is in FY2019.

CO2 reduction result in FY2025)

In FY2025, we could achieve the CO2 reduction target.

Following tables show the discharged CO2 ratios to FY2019 (base line).

“Scope-1” and “Scope-2” are simple ratios to generated amount for each item

For scope-1, We kept the same level of discharge CO2 amount, in FY2024 / In FY2019 is 1.04, and In FY2025 / In FY2019 is 1.00. As in FY2024, we continued our CO2 reduction efforts. However, no major CO2 reduction initiatives were introduced in FY2025.

For scope-2, As same as scope-1, we continued our CO2 reduction efforts. However, no major CO2 reduction initiatives were introduced in FY2026. The ratio FY2024/FY2019 is 0.38、 and the ration FY2025/FY2019 is 0.39.

The figure is similar to that of the previous year. However, the CO2 emission factor reported by the electricity supplier to the Ministry of the Environment differs from the factor applicable to our contract plan. Based on the actual emission factor, the FY2025/FY2019 ratio is 0.28, demonstrating a favorable reduction trend.

“Total” is basic unit; discharged CO2 amount / Sales

To eliminate the influence of sales and/or amount of production.

As you can see the following, we could achieve the CO2 reduction plan in FY2025.

1, Scope-1

Specific items; shipping, air conditioning

		FY2019	FY2025
Head Office /Fuchu Factory	Gasoline	1.00	1.00
	Light Oil	1.00	1.12
	Kerosene	---	---
	LPG	---	---
Iwate Factory	Gasoline	1.00	0.23
	Light Oil	1.00	0.95
	Kerosene	1.00	0.64
	LPG	1.00	1.52
Total		1.00	1.00

2, Scope-2

		FY2019	FY2025
Head Office /Fuchu Factory	Electricity	1.00	0.67
Iwate Factory		1.00	0.36
Total		1.00	0.38

3, Total

To eliminate the influence of sales and/or amount of production, we shall use basic unit.

Basic unit = discharged CO2/sales (kg-CO2/M yen)

		FY2019	FY2025
Head Office And Iwate Factory	total	1.00	0.53

Our target in FY2025 is 0.75, and 0.54 in FY2030.

We achieved this target in FY2025, and in FY2030, final target, following in the previous year. As noted above, when the CO2 emission factor applicable to our electricity supply plan is applied, the FY2025/FY2019 ratio improves from 0.53 to 0.45, which reflects the company's current performance level. We will continue to keep this level from next year onwards.

The charge of SBT and this GHG Inventory Data is Jun Saito, the factory manager of Iwate factory, Nomura-sangyo Co., LTD.
